# #1 Hybrid Cloud Backup-as-a-Service Solution

Imagine being able to protect all of your business data with a single cloud-based solution. With Acronis Cyber Backup Cloud you can work without worry and advance your business knowing your data is safe.The solution allows you to keep your business running by easily and efficiently implementing the most secure, hybrid-cloud backup available – without jeopardizing system performance. Acronis integrates layers of security, including advanced anti-ransomware technology, and delivers flexibility when choosing backup storage so you can control your data and easily comply with any regulations.

**KEY FEATURES** --------------------------------------------------------------------------------

### Protection for 20+ platforms

Having one solution for all systems reduces complexity and costs, especially when compared with deploying multiple backup tools for different types of systems. We support Windows and Linux servers and VMs, eight major hypervisors, PCs, Macs, iOS and Android mobile devices, Microsoft on-premises apps, SAP HANA, Oracle Database, Office 365, G Suite, and websites.

### Top-notch backup and restore speed

Shorten your recovery times, reduce RPO, and minimize impact on your systems' performance with Acronis' next-gen archiving technology, the result of more than 15 years of ongoing research and innovation, which allows best-in-industry backup and recovery speed – at 500 MB/sec and faster.

### Acronis Active Protection against ransomware

Stop ransomware with the backup industry's most advanced, AI-based anti-ransomware technology that protects files, backups, and the backup agents in real-time. Any files impacted before an attack was deflected are automatically restored.

### Seamless deployment and maintenance

Forget about implementation hassles. Acronis Cyber Backup Cloud is a turn-key, all-in-one BaaS solution, with almost no requirements or special prerequisites for customers. Only a lightweight backup agent is needed for installation.

**KEY BENEFITS** ------------------------------------------------------------------------------------

### Work without worry – your data is safe and secure

Ensure peace of mind and stay CyberFit with the most secure BaaS solution on the market today. A range of features make this possible, including integrated, AI-based anti-ransomware, cryptomining protection, blockchain-based backup files notarization, AES-256 data encryption in-transit and at rest, and 2-factor authentication for login.

### Rest assured your data will be recovered reliably

TThe ability to successfully restore data is a critical component of data protection. With Acronis, you can ensure a number of proprietary technologies such as TIBX backup format with in-archive consistency verification to avoid corruption of backup files; Acronis Universal Restore to recover systems quickly to any hardware or environment, without incompatibility issues; and Application-aware recovery for MS Exchange, SQL Server, , SharePoint, and Active Directory, Oracle DB, and SAP HANA.

### Achieve best-in-industry RTOs

Ensure top-notch backup and restore speed and get back to work fast by leveraging an asynchronous data access engine with top-notch 500 MB/sec
